

## VRG... Series

### VRG... Butterfly Valves

### Description

VRG... series threaded butterfly valves control the flow of biogas.

### Features

- Exclusive, patented technology\*
- ½" to 4" NPT threaded versions available
- ½" to 3" Rp threaded versions available
- Full, medium, or reduced port versions available to optimize pressure drop and flow control
- Shaft supported by precision bearings for repeatable performance
- Low leakage rate at full closed position without a beveled disk
- Low pressure drop at the full open position
- Corrosion-resistant for outdoor applications
- Clear position indication on a 2" laser-etched, anodized dial
- 90° clockwise or counterclockwise rotation
- Manual kits available for fixed position adjustment
- Crank arm kit available for linkage applications
- Valve actuator assemblies available (Document No. VA-7000)
- Flow in either direction

\*Patented under US Patent No. 9,915,352

---

## Application

VRG... series butterfly valves control the flow of biogas. Valves are positioned using a manual kit, crank arm kit, or rotary actuator. VRG... series butterfly valves are not intended for use as shutoff valves. The valve body contains (2) identical female pipe threads for a gas tight seal with piping. Full, medium, and reduced port sizes are offered to optimize control.

---

## Use

VRG... series butterfly valves are designed for use with slightly aggressive and dry gases such as biogas, digester gas, and some process gases. These gases can have a concentration of no more than:

- 1% (by volume) of hydrogen sulfide (H<sub>2</sub>S)
- 1% (by volume) of ammonia (NH<sub>3</sub>)

In addition, condensation (moisture) in the valve is not permitted!

If other aggressive gas components are encountered other than the ones listed above, contact SCC to determine the suitability of a VRG... valve.

---

---

## Product Part Numbers

The part number structure includes port size, pipe size, and thread type. The example part number is a VRG... series full port, 2" NPT butterfly valve.

	<b>VRG</b>	<b>10</b>	<b>.</b>	<b>050</b>	<b>U</b>
<b>Model</b>					
<b>Port Size</b>					
10 = Full Port					
20 = Medium Port					
30 = Reduced Port					
<b>Pipe Size</b>					
<b>(mm) (inches)</b>					
015 = 1/2" → Full Port only					
020 = 3/4" → Full Port only					
025 = 1" → Full Port & Medium Port					
032 = 1-1/4" → Full Port & Medium Port					
040 = 1-1/2"					
050 = 2"					
065 = 2-1/2"					
080 = 3"					
100 = 4" → NPT only					
<b>Thread Type</b>					
U = NPT					
E = Rp					

## Product Part Numbers (continued)

NPT threaded butterfly valve part numbers, ratings, and port diameters are tabulated below.

**Table 1: NPT Threaded Butterfly Valve Part Numbers**

Port Type	Part Number	Max Operating Pressure	Max Surge Pressure	Temperature Range	Pipe Size inch	Port Diameter inch [mm]
Full	VRG10.015U	25 psig [170 kPa]	75 psig [510 kPa]	-20 to 160°F [-29 to 70°C]	1/2	0.61 [15.5]
	VRG10.020U				3/4	0.87 [22.1]
	VRG10.025U				1	1.10 [27.9]

## Accessories

### VA... Valve Actuator Assemblies

Valve actuator assemblies ensure proper shaft alignment and engagement. A VRG... valve, SQM... actuator, coupling, and bracket are built, tested, and shipped as a VA... assembly. Valve actuator assemblies are available with the following Siemens actuators:

- SQM45...
- SQM33...
- SQM40/41...
- SQM5...

For additional information see Document No. VA-7000.

### AGA92.1

A manual kit with fine adjustment can be added to any VRG... butterfly valve for use as a flow restrictor. The kit allows for precision position adjustment by turning a hex coupling; (14) revolutions make a 90° stroke. Locking nuts maintain the precise position at all rated flow pressures.

### AGA92.2

A manual kit with coarse adjustment can be added to any VRG... butterfly valve.

### AGA92.3

A crank arm kit with (6) 3/8" clearance holes can be added to any VRG... series butterfly valve for use with a linkage system.

## Materials

Below is a typical valve cross-section that identifies the materials used in the VRG product line.

**Table 3: VRG Parts**

Item	Description	Material
A	Valve body	Aluminum-6061
B	Seal	HNBR
C	Shaft	Stainless Steel (300-series)
D	Dial	Aluminum-6061
E	Shim	Teflon
F	Bearing (ball)	Steel
G	Shim	Stainless Steel
H	Fastener	Steel / Stainless Steel
I	Disk	Stainless Steel (300-series)
J	Bearing (sleeve)	Acetal
K	Bearing (thrust)	Acetal
L	Spring	Stainless Steel (17-4 PH)
M	Plug	Aluminum-6061

**Figure 1: Cross-section of a VRG10.040U**

## Installation

- Use suitable pipe thread sealant on all piping connections.
- **DO NOT** use the “plug” or “shaft” as a wrench grip. **ALWAYS** use a wrench on the provided valve body wrench flats when piping.
- Valve can be mounted in any orientation.
- Do not interfere with or modify the butterfly valve.
- All activities (mounting, installation, service work, etc.) must be performed by qualified staff.
- Fall or shock can adversely affect the function of these valves. Such valves must not be put into operation, even if they do not exhibit any damage.
- No special tools are required.
- Ensure the installation complies with relevant local and national codes.
- VRG... butterfly valves do not require maintenance.
- From the 0° full closed position, disk may turn in either direction to increase flow.
- Accommodates flow in either direction.

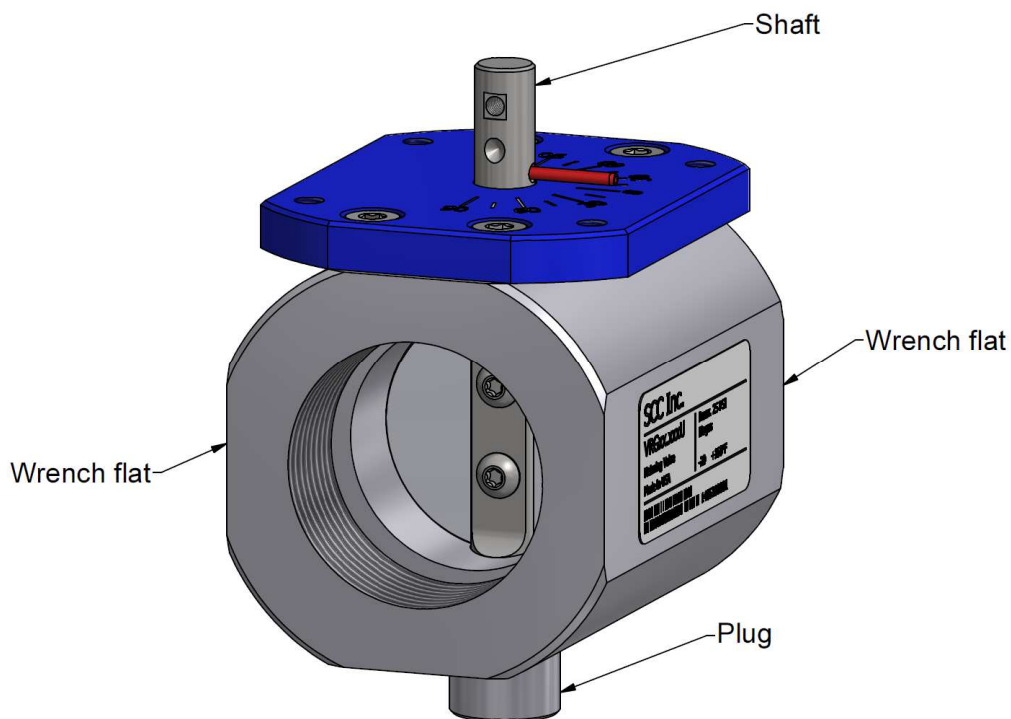

Figure 2: Isometric View of a VRG10.040U

## Flow Data

Biogas flow (SCFH) through the valve body and the corresponding boiler horsepower (BHP) are tabulated at common differential pressures. Valve data is sorted by ascending Cv value for ease of selection. Cv values can be utilized to calculate flow at any operating condition (see page 13).

Flow is calculated with an inlet pressure of 15" wc, a media temperature of 60°F, and a specific gravity of 0.86. Horsepower assumes a boiler efficiency of 85% and a biogas heating value of 550 BTU/SCF.

**Table 4: Flow Rates of Biogas at Full Open Position (0.5-3" wc Differential Pressure)**

## Flow Data (continued)

**Approximate** pressure drops for a valve at a given flow rate may be determined using the chart below.

Note: When the pressure drop is more than 50% of the inlet pressure ( $P_1$ ), choked flow occurs and the chart is no longer accurate.

Flow is calculated with an inlet pressure of 1 psig, a media temperature of 60°F, and a specific gravity of 0.86.

**Figure 3: Logarithmic Scale Plot of VRG Biogas Flow Capacities for Full Open Position**

## Flow Data (continued)

Flow rate (SCFH) through the valve body at the full open position can be estimated using the equation below and the  $C_v$  values from Table 4.

$$Q = 1360 \times C_v \times \left( \sqrt{\frac{P_1 + P_2}{GT_f}} \right) \times \left( \sqrt{\frac{P_1 - P_2}{2}} \right)$$

...where...

$C_v$  = Flow coefficient (see Table 4)

$G$  = Specific gravity of gas (see Table 7)

$P_1$  = Absolute inlet pressure in PSIA (PSIG + 14.7)

$P_2$  = Absolute outlet pressure in PSIA (PSIG + 14.7)

$Q$  = Flow rate in SCFH

$T_f$  = Media temperature in degrees Rankine ( $^{\circ}\text{F} + 460$ )

Boiler horsepower is calculated using the equation below.

$$\text{Boiler hp} = Q \times (\text{HHV}) \times \eta \times \frac{1 \text{ Boiler hp}}{33,475 \text{ BTU/HR}}$$

...where...

$Q$  = Flow rate (SCFH)

HHV = Higher Heating Value (BTU/SCF)

$\eta$  = Boiler efficiency (assume: 85% efficiency or 0.85)

**Table 7: Constants for Boiler Horsepower Calculations by Applicable Gases**

Type of Gas	Specific Gravity	Higher Heating Value (BTU/SCF)
Biogas	0.86	550

---

## Actuator Torque

Torque requirements for the 4" full port valve (VRG10.100U) are tabulated at various differential pressures to ensure proper actuator selection. The VRG10.100U valve requires more torque than all other models. Maximum torque occurs at approximately the 60 degree position at high flow rates. A maximum of 20 in-lbs is required to modulate any VRG... valve.

**Table 8: Maximum Torque Values at Various Pressure Differentials**

Differential Pressure		Torque	
psi	kPa	in-lbs	N-m
6	41	10	1.13
10	69	15	1.69
15	100	20	2.26

## Dimensions

Dimensions in inches; millimeters in brackets

Figure 4: Dimensions of the VRG... Valve Shown on a VRG10.050U

Table 9: VRG... Valve Dimensions

Part Number	A	B	C	D	E*
VRGxx.015x	1.35 [34]	1.04 [26]	2.08 [53]	3.25 [83]	2.52 [64]
VRGxx.020x	1.35 [34]	1.04 [26]	2.08 [53]	3.25 [83]	2.52 [64]
VRGxx.025x	1.35 [34]	1.04 [26]	2.08 [53]	3.25 [83]	2.52 [64]
VRGxx.032x	1.53 [39]	1.22 [31]	2.44 [62]	3.25 [83]	2.70 [69]
VRGxx.040x	1.63 [41]	1.31 [33]	2.63 [67]	3.25 [83]	2.80 [71]
VRGxx.050x	1.87 [47]	1.55 [39]	3.11 [79]	3.25 [83]	3.03 [77]
VRGxx.065x	2.18 [55]	1.87 [47]	3.74 [95]	4.38 [111]	3.29 [84]
VRGxx.080x	2.44 [62]	2.13 [54]	4.26 [108]	4.38 [111]	3.58 [91]
VRGxx.100U	2.96 [75]	2.64 [67]	5.28 [134]	5.00 [127]	4.09 [104]

\* Dimension E shown on page 17
